

Ezi Bar Panel

Sectional Overhead Door

**EZI-ROLL SHUTTERS | AUSTRALIAN LEADERS
QUALITY | INNOVATION | DESIGN**

The **Ezi Bar Panel** is a commercial grade Aluminium Sectional Door which is ideally suited to undercover carpark structures where the headroom above an opening is limited. This door has been designed with security and functionality in mind. A strong and rigid aluminium frame is threaded with 19mm aluminium bars creating a contemporary aesthetic while ensuring long-term durability. The **Ezi Bar Panel** is available in a wide range of powder coated colours and sizes.

HISTORY

Ezi-roll Doors Australia has been manufacturing industrial and commercial doors since 1971. Since its inception, Ezi-Roll Doors Australia has been continuously developing its products in both design and manufacturing efficiencies. The **Ezi Bar Panel** is one example and it is featured below.

RECOMMENDED APPLICATION

The **Ezi Bar Panel** is suitable for openings ranging from 1.9m to 3m high and up to 6m wide. This horizontal bar panel curtain is designed to ensure maximum security and strength is provided for applications such as secure parking structures, commercial building security, hi-rise commercial or residential buildings and sporting complexes. This door also allows a large amount of visibility and ventilation.

THE COMMERCIAL SECURITY DOOR

The **Ezi Bar Panel** is constructed of 19mm aluminium tubing that is threaded through Eziroll's unique aluminium frame. This method of assembly allows for minimal wall offsets for required hinge and bracket attachment. The **Ezi Bar Panel** is supplied standard in mill finish however aluminium framing may be powder coated as an optional extra.

LOW HEADROOM

The **Ezi Bar Panel** can be installed in a headroom of 300mm plus motor in standard lift applications or 190mm plus motor in rear mount, low headroom applications.

MANUAL / AUTOMATIC OPERATION

The **Ezi Bar Panel** can be manually or electrically operated. There is a range of electric motors available depending on application and usage. Automatic doors may be interfaced with external access devices such as remote control transmitters, exit loops, key pads, card readers or similar.

LOCKING

Automatically operated **Ezi Bar Panel** doors are self locking. Additional internal shoot bolt locking or external handle locking can be provided on manually operated doors. Manual locking systems are not recommended for use on automatic doors.

SPRING ASSISTED

The **Ezi Bar Panel** is spring assisted and counterbalanced by high quality steel torsion springs which mechanically assist the doors operation through its lifting cables. For high cycle applications, the door can be configured with high cycle rated springs on request.

BOTTOM RAIL

The **Ezi Bar Panel** is supplied with a sturdy aluminium bottom rail which includes a rubber weather seal. Optional top and side weather seals may be supplied on request.

WARRANTY

A 12 month limited material, labour and workmanship warranty applies to the **Ezi Bar Panel**.

ARCHITECTURAL SPECIFICATION

Proprietary Item: Ezi-roll "Sectional Overhead Door" Ezi Bar Panel or equal approved. Refer to drawings for locations.

Door Frame: Door to be constructed of high density aluminium, interlocked and riveted together. Supplied in mill finish or powder coated.

Door Curtain: 19mm aluminium tubing threaded through aluminium framing, supplied standard in mill finish. Aluminium framing may be powder coated as optional.

Hinging: 3mm heavy duty steel hinges and stainless steel cables to be supplied as standard.

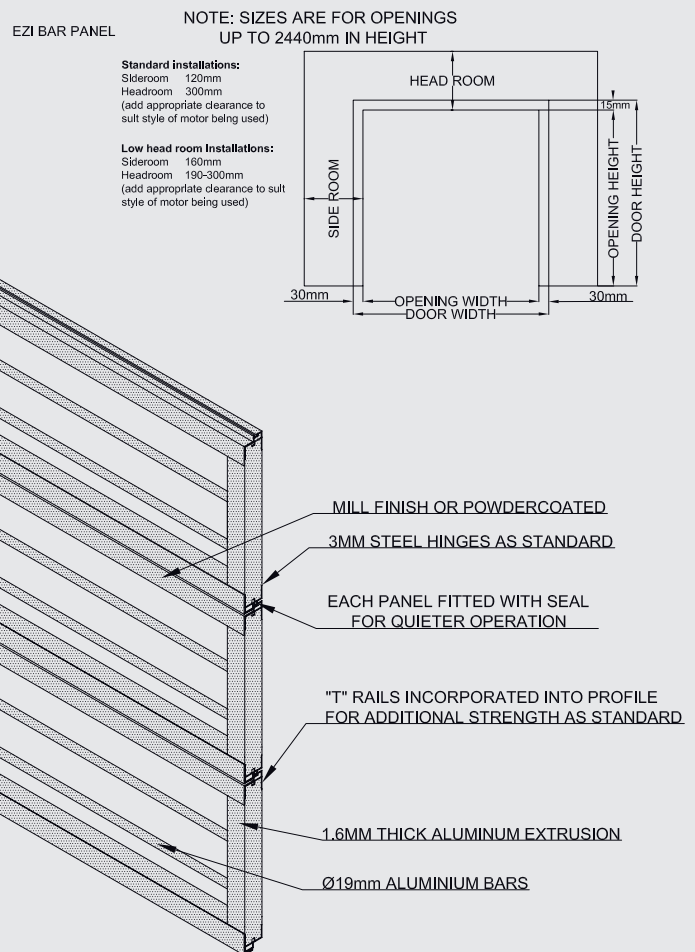

Size: Doors to suit openings up to 3m high and up to 6m wide. Doors over 4.95m wide to be supplied with double end stiles.

Tracking: 2.5mm galvanised tracks to be supplied on or fixed to the wall using appropriate fixings. Tracks accommodate 48mm nylon bearing stem rollers.

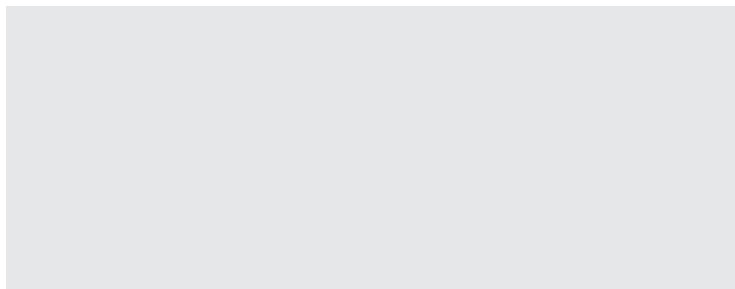

Operation: The door can be either manually operated or motorised depending upon size requirements.

Ventilation: The door shall provide a maximum of 69% free airflow.
